Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) The invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) The invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

(e) The invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claim 1, 6, 10 and 31 are rejected under 35 U.S.C. 102(e) as being anticipated by Bowman et al. (U.S. Patent # 6, 91,283):

Art Unit: 2838

Bowman et al. discloses claimed subject matters a battery operated LED lighting apparatus (figure 2), including a battery (figure 2, item B1), a boost regulator (figure 2, item 104), at least one light emitting diode (figure 2, item 102a-n) and maintains the constant voltage (column 6, line 50-68), a current sensor (figure 2, item 106), a feedback path (figure 2, item LED current feedback).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

1. Claims 2-5, 7-9, 11-30 and 32-40 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bowman et al. (U.S. Patent # 6,91,283) in combination with Hochstein (U.S. Patent # 5,661,645) and further in combination with Lebens et al. (U.S. Patent # 6,305,818 B1).

Bowman et al. disclose the claimed subject matters as explained in the claims 1, 6, 10 and 31, above. However Bowman does not disclose the utilization of the technique for a LED segregated into groups, the groups connected in parallel, LED connected in series a buck regulator, a subject in film, video, or digital imaging, the microprocessor.

Hochstein teaches the utilization of the similar technique for a LED segregated into

Art Unit: 2838

groups, the groups connected in parallel, LED connected in series a buck regulator (figure 5) and Lebens et al. teaches the utilization of the similar technique for a subject in film, video, or digital imaging, the microprocessor (figure 2, 10 and column 8, line 1-10), a dimmer (column 11, line 35-40, a manually adjustable (column 12, line 25-30), and light intensity control (column 15, line 25-30). It would have been obvious one having an ordinary skill in the art at the time the invention made to modify Bowman et al.'s control circuit by utilizing the technique taught by Lebens et al. for the purpose of providing improved controller for light emitting diodes.
